## Even Stronger, Newly Developed Pro Hard Coating

1

### Scratch Resistant

The recording surface of the pro hard-coating disc is protected by a tough protective coat so it is less likely to be scratched.

2

### Soil Resistant

We made the pro hard-coating disc surface so water repellent that it even repels oil-based pen ink.

3

### Dust Resistant

The surface of the substrate used in the pro hard-coating disc has an anti-static treatment that reduces dust adhesion.
